	Ideal	Score	Instructor Notes
	Score	Score	
Total Points	5	3.5	Score Points:03.50
Total Percentage	100	70	
Column, Row Image Representation	5	5	
Size of Network Internal Matrices	5	5	
Sizes of intermediate Vectors, Matrices	20	20	
Calculating the Sensitivities	20	20	
Explanation of Unequal Gradient	25	20	Actually this is due to the derivative calculations and it does mean that the initial weights take longer to converge.
Mitigate the effect of unequal magnitude gradients	25	0	No updates made that effect updaets to the weights.
